

**NTP Technical Report
on Toxicity Studies of**

β -Bromo- β -nitrostyrene

(CAS No. 7166-19-0)

**Administered by Gavage
to F344/N Rats and B6C3F₁ Mice**

**John R. Bucher, Ph.D., Study Scientist
National Toxicology Program
Post Office Box 12233
Research Triangle Park, NC 27709**

**NIH Publication 94-3389
August 1994**

**United States Department of Health and Human Services
Public Health Service
National Institutes of Health**

Note to the Reader

The National Toxicology Program (NTP) is made up of four charter agencies of the United States Department of Health and Human Services (DHHS):

- the National Cancer Institute (NCI) of the National Institutes of Health;
- the National Institute of Environmental Health Sciences (NIEHS) of the National Institutes of Health;
- the National Center for Toxicological Research (NCTR) of the Food and Drug Administration; and
- the National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control.

In July 1981, the Carcinogenesis Bioassay Testing Program was transferred from NCI to NIEHS. NTP coordinates the relevant Public Health Service programs, staff, and resources that are concerned with basic and applied research and with biological assay development and validation.

NTP develops, evaluates, and disseminates scientific information about potentially toxic and hazardous chemicals. This knowledge is used for protecting the health of the American people and for the primary prevention of disease.

NTP designs and conducts studies to characterize and evaluate the toxicologic potential of selected chemicals in laboratory animals (usually two species, rats and mice). Chemicals selected for NTP toxicology studies are chosen primarily on the bases of human exposure, level of production, and chemical structure. Selection per se is not an indicator of a chemical's toxic potential.

The studies described in this toxicity study report were performed under the direction of NIEHS and were conducted in compliance with NTP laboratory health and safety requirements. These studies met or exceeded all applicable federal, state, and local health and safety regulations. Animal care and use were in accord and compliance with the Public Health Service Policy on Humane Care and Use of Animals.

Single copies of this report are available without charge, while supplies last, from the NTP Central Data Management (telephone number 919/541-1371).

CONTRIBUTORS

This NTP report on the toxicity studies of β -bromo- β -nitrostyrene is based primarily on 4-week gavage studies that began in December 1991 and ended in January 1992 at Microbiological Associates, Incorporated, Bethesda, MD.

National Toxicology Program

Evaluated experiment, interpreted results, and reported findings

John R. Bucher, Ph.D., Study Scientist

Robert E. Chapin, Ph.D.

Michael R. Elwell, D.V.M., Ph.D.

Joel Mahler, D.V.M.

H. B. Matthews, Ph.D.

Michael D. Shelby, Ph.D.

Gregory S. Travlos, D.V.M.

Kristine L. Witt, M.S.

Oak Ridge Associated Universities

Microbiological Associates, Inc.

Principal contributors, subchronic studies

Martin L. Wenk, Ph.D., Principal Investigator

Lucas H. Brennecke, D.V.M.

Lynda L. Pippin, D.V.M.

Research Triangle Institute

Disposition and metabolism study

A. Robert Jeffcoat, Ph.D., Director

Experimental Pathology Laboratories, Inc.

Provided pathology quality assessment

William F. MacKenzie, D.V.M., M.S.

NTP Pathology Working Group

Evaluated slides and prepared pathology report

John C. Seely, D.V.M., Chair

PATHCO, Inc.

Michael R. Elwell, D.V.M., Ph.D.

National Toxicology Program

William F. MacKenzie, D.V.M., M.S.

Experimental Pathology Laboratories, Inc.

Joel Mahler, D.V.M.

National Toxicology Program

Daniel S. Marsman, D.V.M., Ph.D.

National Toxicology Program

Michael Pino, D.V.M., Ph.D.

North Carolina State University

Kimimasa Takahashi, D.V.M., Ph.D.

National Toxicology Program

Analytical Sciences, Inc.

Provided statistical analyses

Steven Seilkop, M.S.

Janet L. Teague, M.S.

Biotechnical Services, Inc.

Provided toxicity report preparation

C. Michael Bailey, B.S. Pharm.,

Principal Investigator

Sophonia A. Roe, B.S.

PEER REVIEW

The draft report on the toxicity studies of β -Bromo- β -nitrostyrene was evaluated by the reviewers listed below. These reviewers serve as independent scientists, not as representatives of any institution, company, or governmental agency. In this capacity, reviewers determine if the design and conditions of these NTP studies are appropriate and ensure that the toxicity study report presents the experimental results and conclusions fully and clearly. The comments of the reviewers were received and reviewed prior to the finalization of this document. Changes have been made such that the concerns of the reviewers have been addressed to the extent possible.
